REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The claimed invention is drawn to the following:

1. (currently amended): A recording material comprising: on a support, a recording layer including a diazo compound, a coupler compound that can react with the diazo compound to form a color, and a metal salt, wherein

the coupler compound is represented by the general formula (1):

General formula (1)

wherein R¹, R², R³, and R⁴ each independently represent a hydrogen atom, an alkyl group, an aryl group, an alkoxy group, or an amino group; R⁵, R⁶, R⁷, R⁸, and R⁹ each independently represent one selected from the group consisting of a hydrogen atom, a halogen atom, an alkyl group, an aryl group, an alkoxy group, an alkoxycarbonyl group, and an acyl or a nitro group; any of R¹ to R⁹ may have a substituent; and X represents an oxygen atom or a sulfur atom.

The amendment to claim 1 removes the rejection wherein the benzothiazole in PIERROT et al contains a nitro substituted group on the phenyl ring which is now excluded from General formula (1). None of the prior art discloses or anticipates the recited recording material comprising said benzothiazole compound as a coupler and accordingly, claims 1-3, 5-20 are seen as allowable and passed to issue.
